

Today: turn-based LLM robot

gaze on: board the other

partner
- speech: “Rome or Paris?” … “Oh, right.”
- gaze
- action: moves to Paris

robot
- decision
- processing time
- speech: “Treat Paris first!”
- gaze
- action: points

Goal: full-duplex robot

partner
- speech: “Rome or Paris?” … “Oh, right.”
- gaze
- action: moves to Paris — *answers and moves while robot speaks*

robot
- decision
- speech: “Treat” | Paris | first!”
- gaze
- action: points

steps in as partner hesitates — *looks and points on “Paris”*
